START TO END SOLUTIONS FOR LAND DEVELOPMENT, RURAL AND URBAN SUBDIVISION AND A RANGE OF LAND-USE PROJECTS

Cato Bolam is a leading land development and planning consultancy. We use our five decades of experience, knowledge and capability to proudly provide a range of services to clients, both large and small. Our aim is creating great places, and to achieve this in a cost-effective way that delivers innovative outcomes.

We provide a wide range of land development consultancy services including:

- Planning
- Civil Engineering
- Surveying
- Architecture & Landscape Architecture
- Environmental Management
- Project Management

We have built a reputation for providing a dependable, professional and high quality service in a friendly and approachable manner. In an environment of ever-increasing complexity, our job is to make the complex simple, to communicate well and to achieve first-class solutions for our clients.

We make it a priority to form sound and enduring relationships with each of our clients, we set high standards for all aspects of our work, and clients trust us to deliver.

Each project we undertake is driven by the values of:

- Listening to our client's needs,
- Understanding those needs, and
- Going beyond client expectations to deliver creative and inspired solutions.

Our reputation has been built over years of working with satisfied clients – we hold that reputation in high regard.

Join our wide range of satisfied clients that we have helped achieve their development aspirations and financial goals, enhanced their lifestyles and created great places for today and our future generations.

We are a medium-sized consultancy operating from six offices, strategically located to enable us to provide a local service that is convenient for our clients. We are committed to best practice and providing integrated solutions that meet our clients' needs, while also understanding the need to balance commercial and environmental objectives, in the end always creating great places.

We take pride in working with the most up-to-date technologies and have a great team of highly experienced and dependable professionals. We are ISO accredited with robust in-house systems and software providing for seamless and efficient project delivery and management.

We strive to be at the top of our game in the advice and services we provide. Our professionals are active in their respective professional organisations and supported in continuing professional development which ensures we remain leaders in our industry.

OUR EXPERTISE - CREATING GREAT PLACES

Specialists in Land Development

From your initial consultation and concept design, right through the Council processes, project management, detailed design, tendering, to arranging and overseeing the contractors who will perform the land and building development work, we walk with you all the way.

Planning

Our planners are highly qualified and knowledgeable in all aspects of District Plan and Regional Plan requirements and Resource Consent processes. We work in both urban and rural areas and on all types and sizes of projects. Our expertise covers the full range of planning services; pre-application meetings, stakeholder engagement, resource consents, council hearings, environment court and hearings commissioner work.

Civil Engineering

We have a large team of qualified civil engineers, experienced in all aspects of land development, with the expertise you need to ensure your project runs smoothly. Innovation and value engineering are forefront with our aim being the delivery of cost-effective design solutions, whether it be a two lot subdivision, a multi-owner complex, or a 100+ site development. We will target our resources to match your needs.

Surveying

Our Registered Professional Surveyors are highly qualified and experienced lead professionals in land development projects. Our survey teams utilise the latest technologies and equipment for all surveying requirements, be it surveying freehold or unit title boundaries, building surveys, setout and certification or UAV/Drone 3D point cloud modeling and aerial photography.

Architecture

Our architecture team undertake a wide range of residential and commercial projects of all scales. We are able to take a project from initial concept design to resource consent, building consent, project management and project completion.

Landscape Architecture

Our landscape architecture team creates spaces that harmonise natural, built, and cultural environments. Through an integrated design approach, we collaborate across disciplines, combining technical expertise with innovative solutions to deliver exceptional results.

Land Contamination

Our land contamination experts are available to provide preliminary site investigation reports, testing, remediation and post-remediation validation for all forms of land contamination.

Ecology

Our ecology experts provide advice and expertise to ensure the environmental impact of your project is a positive one.
